

- Lymphoid Regulators
- Monocyte Activation Pathway
- Chemokine Receptor Pathway
- Immune Response Modulators
- B Cell Differentiation Factors
- Innate Immunity Regulators
- Cell Signaling Modulators
- Leukocyte Function Modulators
- Intracellular Signaling Regulators

- Ribosomal Protein Components
- Immune Cell Surface Markers
- Transcriptional Regulation Factors
- Major Histocompatibility Complex Components
- Cytoskeletal Structural Proteins
- Cell Cycle Control Factors
- Secretory Pathway Regulators
- Additional Ribosomal Protein Components
